

HB 1089 -- NURSING

SPONSOR: Plocher

This bill changes the education requirement for licensed practical nurses to administer intravenous fluid treatment. Currently, the licensed practical nurse must have been instructed and trained in such procedures in a course of instruction approved by the board. The bill instead requires that they have been instructed and trained in such procedures within their practical nursing program or have documented evidence of completion of a separate board approved IV therapy certification course, or who have documented evidence of IV therapy certification in another state or jurisdiction.

This bill requires that one of the nine members of the Missouri State Board of Nursing be an advanced practice registered nurse.
